Think Buzan Mind Mapping: *Learn to Leverage the Language of Your Brain* **Speaker: Margaret Miller, MSOD**

Tony Buzan, the inventor of Mind Mapping, notes, "Mind Mapping is a thinking tool that reflects externally what goes on inside of your head." Discover how to leverage your brain to solve personal and business problems through the use of central images, radiant thinking, curvilinear branches, color, image, the freedom of one word, and associations. Margaret Miller, Think Buzan Licensed Facilitator and Organizational Effectiveness Business Consultant, will take the session participants through a brief history of mind mapping, teach the learners how to create hand drawn mind maps, and demonstrate the simplicity of speed mind mapping using the software imindmap5. The learners will be able to add a powerful problem solving, creativity, planning, and brainstorming tool for personal and professional use. If you would like to learn more about mind mapping prior to the session, please use this link:
